## MONTANA SAFETY ASSESSMENT AND MANAGEMENT SYSTEM

Immediate Danger Assessment: ☒ Original ☐ New Incident

REPORT NAME: Kolstad	DATE OF REPORT: 8-18-23	DATE OF ASSESSMENT: 8-18-23
REPORT NUMBER: 577995	CHILD PROTECTION SPECIALIST NAME: Cindi Baillargeon	
CHILD PROTECTION SPECIALIST SUPERVISOR NAME: Crystal Whitmore		

Immediate danger is the identification of safety threats that are Immediate, Significant, Clearly Observable and actively occurring or in process of occurring and will likely result in actual or substantial risk of physical or psychological harm to a child.

Describe how Immediate Danger is NOT identified at the initial contact, or subsequent contacts, with the child and/or parents. Provide information about the family conditions that are providing for basic needs and actively controlling for safety.

Daughter (14) texted a friend stating she was suicidal. Child identifies as a male & parents do not accept this. Parents were unaware the child was suicidal, but when it was unexplained they agreed to take her to the hospital & get the care she needed. Child was admitted to the hospital for suicidal attempt (drank toilet bowl cleaner, & took several IBU Profen earlier in the day). Child had a knife in her pocket at the hospital. ~~Parents~~ No disclosures of any physical abuse by the child.

**Supervisory Consultation after first contact with the child(ren):**

Supervisory consultation must be completed within 24 hours of the first face-to-face contact with all children in the family.

CPSS Name and Date of consultation (if completed by phone):

Christina Hughes

Date 8-18-23 @ 10:38pm

☐ Information deemed sufficient; no Immediate Danger(s) identified.

Supervisory notes regarding consultation: (optional)
